Thank you for giving me this opportunity. My name is Khelendra Pratap Singh. I am from Satna District of Madhya Pradesh.

I have been working in IT industry since last 6 years on J2EE Technology.

I did my bachelors of Engineering from Ujjain Engineering College, Ujjain in 2018 and completed my primary education from satna only.

I have been working with the Cyber Manager Software Services (CMSS) since August 2023 as a SOFTWARE ENGINEER WITH NATIONAL STOCK EXCHANGE(NSE) and prior I worked with the AIMFORTECH SOLUTION from January 2020 to July 2023 as a SOFTWARE DEVELOPER.

With regards to current role my responsibility is to understand the requirement, design, develop the code with optimise approach keeping the application performance high, commit the code, merge it with the branches, test the functionality, deploy in UAT, resolve the Checkmarx and EPT(External Penetrating Testing) finding, Vulnerability assessment and deploy in Production in presence of Support team.

From where I got the exposure for complete software development life cycle starting from the requirement gathering to delivery with minimal time and team size without compromising the quality.

I Have expertise in Java, Microservice, Spring boot, Spring MVC, Hibernate, JPA, servlet, jsp

I also have the good understanding of UML diagrams. I have also worked on design patterns in my application.

On the area of My project, In current employment I worked with the 3 application BOND, FIXEDIN, IISLNET and in previous company worked with 2 projects E-skill-web and Airtech Marketing.

In my project

BOND : I used Spring MVC, Hibernate as backend, AngularJS as frontend, and oracle as database.

FIXEDIN : I used Spring boot, Spring data jpa as backend, oracle as database and envoled in REST API development.

IISLNET : I used JSP, Sevlet, hibernate.

E-skill-web: spring boot, Spring data jpa

Airtech: Java, Spring Boot, Spring Data Jpa, Hibernate 4.0

About my strength, I am flexible and adaptable towards my work and enthusiastic to learn new things. I am hard worker and I work smartly. I can provide end-to-end solution in the project and I have worked on vertical layers.

With respect to my weakness, I think I have to improve my knowledge on technologies like react and angular in front end.

Thankyou for the opportunity, time and concern to know about me.
